PROFESSIONAL SUMMARY

BS Information Technology graduate and Full-Stack Web Developer with hands-on experience building responsive, database-driven applications using React, JavaScript, Node.js, Express.js, and MongoDB. Developed projects involving REST APIs, authentication, CRUD operations, reporting, and deployment. Brings over five years of experience across administrative operations, IT support, data processing, and technical troubleshooting, with strengths in documentation, user support, and translating business needs into practical solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Bootstrap, responsive web design, DOM

Backend: Node.js, Express.js, REST APIs, authentication, CRUD workflows; PHP/Laravel and C#/.NET fundamentals

Databases: MongoDB, Mongoose, SQL, MySQL, PostgreSQL

Development Tools: Git, GitHub, Postman, VS Code, Vite, GitHub Pages, Render, Vercel

Additional: Python fundamentals, WordPress, troubleshooting, Microsoft Office, Google Workspace

SELECTED DEVELOPMENT PROJECTS

Inventory Management System | Full-Stack Application

- Developed inventory workflows with role-based access, approval processes, dashboards, and exportable PDF/Excel reports.

Repository: github.com/Bmorta/inventory-management-system

TaskMate — Task Management System | MERN Stack

- Built a React, Node.js, Express.js, and MongoDB task management application with authentication, task CRUD, assignments, notifications, filters, and dashboard statistics.

Repository: github.com/Bmorta/task-management-system

E-Commerce REST API | Node.js, Express.js, MongoDB, Mongoose

- Created REST API endpoints and database-backed product management workflows, with API testing and deployment.

Repository: github.com/Bmorta/ecommerce-api
